Note. A dash (*f*) indicates data are not reported to protect student anonymity. When the number of dropouts is not reported, the total number of students is presented in intervals of 15 to provide a general idea of the number of students in the group while maintaining student anonymity. In a group of <150, for example, the number of students is between 135 and 149. A dot (.) indicates there were no students in the group or, in rare cases, that a reporting anomaly prevented calculation of the rate.

Note. A dash (*f*) indicates data are not reported to protect student anonymity. When the number of dropouts is not reported, the total number of students is presented in intervals of 15 to provide a general idea of the number of students in the group while maintaining student anonymity. In a group of <150, for example, the number of students is between 135 and 149. A dot (.) indicates there were no students in the group or, in rare cases, that a reporting anomaly prevented calculation of the rate.

Note. A dash (*f*) indicates data are not reported to protect student anonymity. When the number of students represented by a final status is not reported, the class size is presented in intervals of 50 to provide a general idea of the number of students in the class while maintaining student anonymity. In a class of <150, for example, the number of students is between 100 and 149. Completion I consists of students who graduated or continued high school. Completion II consists of students who graduated, continued high school, or received General Educational Development (GED) certificates.

Note. A dash (*f*) indicates data are not reported to protect student anonymity. When the number of students represented by a final status is not reported, the class size is presented in intervals of 50 to provide a general idea of the number of students in the class while maintaining student anonymity. In a class of <150, for example,

Note. A dash (*ƒ*) indicates data are not reported to protect student anonymity. When the number of students represented by a final status is not reported, the class size is presented in intervals of 50 to provide a general idea of the number of students in the class while maintaining student anonymity. In a class of <150, for example, the number of students is between 100 and 149. Completion I consists of students who graduated or continued high school. Completion II consists of students who graduated, continued high school, or received General Educational Development (GED) certificates.

Note. A dash (ƒ) indicates data are not reported to protect student anonymity. When the number of students represented by a final status is not reported, the class size is presented in intervals of 50 to provide a general idea of the number of students in the class while maintaining student anonymity. In a class of <150, for example, the number of students is between 100 and 149. Completion I consists of students who graduated or continued high school. Completion II consists of students who graduated, continued high school, or received General Educational Development (GED) certificates.

Note. A dash (*f*) indicates data are not reported to protect student anonymity. When the number of students represented by a final status is not reported, the class size is presented in intervals of 50 to provide a general idea of the number of students in the class while maintaining student anonymity. In a class of <150, for example, the number of students is between 100 and 149. Completion I consists of students who graduated or continued high school. Completion II consists of students who graduated, continued high school, or received General Educational Development (GED) certificates.

Note. A dash (*f*) indicates data are not reported to protect student anonymity. When the number of students is not reported, the cohort is presented in intervals of 50 to provide a general idea of the number of students in the cohort while maintaining student anonymity. In a cohort of <150, for example, the number of students is between 100 and 149. GED = General Educational Development certificate.

In a cohort of <150, for example, the number of students is between 100 and 149. GED = General Educational Development certificate.

All Students

All students reported is a cumulative total of students served at the campus or in the district, county, or state during the school year.

At-Risk

An at-risk student is one who is identified as at risk of dropping out of school according to state statute (Texas Education Code §29.081, 2007).

Class

A class is a subset of a Grade 9 cohort (see Cohort) used to calculate longitudinal student status rates. A class consists of members of a Grade 9 cohort less those who leave the Texas public school system for reasons other than

Other Leaver

An other leaver is a student reported by a district as having left school for reasons other than graduating, receiving a GED, or dropping out. In most cases, other leavers exit Texas public school to enter other educational settings, such as private schools in Texas, schools out of state, or home schooling. For more information on the definition of an other leaver, refer to the Public Education Information Management System Data Standards (e.g., TEA, 2007a) and the report, Secondary School Completion and Dropouts in Texas Public Schools (e.g., TEA, 2008a).

Student Identification Error

A student identification error is a student record submitted to the agency with problematic identification information. The unique identifying information of a student record permits year-to-year tracking of a student. A student identification error prevents tracking.

Underreported Student

An underreported student is one who is reported in attendance but for whom neither reenrollment nor leaver information is reported subsequently.
