1. The first step is to identify the problem. This involves understanding the situation and the goals that need to be achieved. It is important to gather all relevant information and to define the problem clearly.

2. The second step is to generate possible solutions. This involves brainstorming and thinking creatively about different ways to solve the problem. It is important to consider all possible options, even those that seem unlikely or unconventional.

3. The third step is to evaluate the possible solutions. This involves comparing the different options and determining which one is the most feasible and effective. It is important to consider the costs, benefits, and risks of each option.

THSCS Activities

4. The fourth step is to implement the chosen solution. This involves putting the plan into action and monitoring the progress. It is important to stay flexible and be prepared to make adjustments if necessary.
