A school district or charter school comprised of only one campus that shares the same 2018 performance data with its only campus must meet the performance targets for the campus to demonstrate acceptable performance. For these single-campus school districts and charter schools, the 2018 performance targets applied to the campus are applied to the district, ensuring that both the district and campus receive identical ratings. Single-campus districts receive either a *Met Standard* or *Improvement Required* rating for 2018 to align with the campus rating.

The scaling processes that are used for districts are also used for campuses (by campus type).

The following methodology is used to calculate domain and overall ratings for campuses (by campus type).

Step 1: Determine a scaled score for the STAAR and College, Career, and Military Readiness (CCMR) components of the Student Achievement domain using the scaling methodology provided in this chapter.

Determine a scaled score for the graduation rate component using the conver (s)6.1 (e)-1.1i9.2 (l)-erm.7 (c)65 (c)-3

Step 7: Weight the better

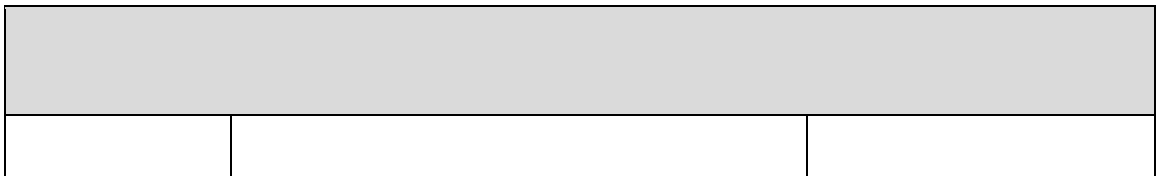
The following table shows the 2018 campus cut points for each rating. These cut points apply to the overall rating as well as the rating for each domain.

Campus School Progress, Part B: Relative Performance lookup tables are available at the end of this chapter.



How to Convert to a Scaled Score

Use the cut point tables to convert a raw domain or component score to a scaled score following corresponding formula.
